

Dear Parents/Guardians,

While schools will be closed from 3/17-3/30 due to COVID-19, please ensure your student is continuing to practice their math and reading skills. This packet provides many enrichment opportunities for your student to work on over the next few weeks. Students were asked to bring home their Chromebooks to have access to technology and educational websites. Students who were in attendance on 3/16 did receive a hard copy of the packet and for those students who were absent, I have mailed their packets home. Below is a list of websites that students can access from home with the login codes. Some of the websites do not require login codes. It is essential for students to take time to work on reading and math each day, as they have worked so hard this year to attain many of these skills! I will be available via dojo and email should you have any questions or concerns regarding the enrichment activities and will be providing students with feedback on their online activities, as they complete them. I will also be updating the class website ([fulletray.weebly.com](http://fulletray.weebly.com)) so please continue to check that as well. Students will turn in their packets when we return to school. I have also attached resources from CPS for 4th, 5th and 6th grades to the email I sent out and on the class website. Thank you again for your continued cooperation and support during this time. Stay safe and healthy!

All the best,

Ms. Fullett

Read Theory: [www.readtheory.org](http://www.readtheory.org)

**username:** student's first and last name (no spaces) **password:** rayschool123

Read Works: [www.readworks.org](http://www.readworks.org) click student login and enter code: pcrkj. Click on student name and enter password: 1234 and then click current assignments

EPIC: [www.getepic.com](http://www.getepic.com) class login code (xhb0093)

Scholastic: <https://classroommagazines.scholastic.com/support/learnathome.html>

Wilson Sight Words (attached in this packet-please practice both reading and spelling)

Some other activity suggestions:

- Make up math problems with equations and have someone solve it
- Create a math bingo
- Measure and record. How far can you run, jump etc.
- Write a letter
- Write sentences with your wilson words and sight words
- Practice multiplication facts 1-12
